The Nodes of the Moon at birth are well known in Vedic, karmic and evolutionary astrology as indicators of the soul energies we embody in this lifetime along with fellow humans born in our same year. The North Node is known by many as the Soul's Mission for this lifetime. The sign of the South Node of the Moon is known as past life talents, tendencies and hang-ups that we bring in with us at birth that link us to our evolutionary past. But there is more to the story than this. Using a technique brought to light by prominent astrologer Jan Spiller, Kari will give us the finer points of our evolutionary story, past to present, as outlined by the prenatal eclipses that took place when we were in-utero. These can vary from the signs of the natal North and South nodes of the Moon in a way that individualizes our Mission further. The degree of the prenatal eclipses and the Nodes of the Moon as interpreted through their corresponding Sabian Symbols also give intriguing further insight.

At birth, the energy of both the prenatal Solar Eclipse and the prenatal Lunar Eclipse enter the body. By knowing the signs and degrees of the eclipses preceding your birth, you can identify the covenant you made with the Universe in exchange for reincarnating on the planet at this time. The sign of your prenatal Solar Eclipse shows the universal energy that your soul has been infused with and that you have promised to spread on the Earth to help with the planet's growth and evolution. The sign of your prenatal Lunar Eclipse indicates the soul/life lessons you are here to learn for your soul to evolve. Your choice lies in whether you choose to share your Solar Eclipse Gift in a positive way or in a negative way. This choice, in return, impacts the degree of ease you will encounter in mastering your prenatal Lunar Eclipse lessons. Understanding the way to fulfillment of our contracts with the Universe gives further direction as well as affirmation to how we have chosen to live our lives. It solidifies our commitment to helping ourselves, our fellow humans and the planet's living things, to evolve during this crucial moment in Earth's history.
